More Gurgly Brash, "Lump of Lend," Bad Digestion, Heartburn or Stomach Troubles.

The man who can't help making faces at his stomach, the man or woman with a grouchy digestion, or with downright dyspepsia need fret no more over stomach troubles.

The heaviest, richest dinners, the most unspeakable quick lunches, all can be taken care of without imposing on the stomach. A scientific digestive can do the digesting, where the stomach either did not do it before, or did it very imperfectly.

Her Majesty decided to refrain from continued, and her meetings with courtiers and diplomats have been of a purely informal nature ever since the war began.

The Queen's mode of living is of the utmost plainness consonant with her position. She is as a rule kept busy with State affairs, but every moment when she can break away from her sovereign duties is given to the supervision of the training and education of her little daughter, the Princess Juliana.

Prince Henry, the Queen's consort, has entirely obliterated his personality from Dutch affairs of State during these Trying times, and he never by any chance interfers in the politics of the country of his adoption. PARIS, February 27.—A Matin dispatch from Athens repeats the story published several times recently that the Sultan of Turkey is preparing to leave Constantinople, and that imperial trains are kept with steam up in the rallroad stations. The dispatch adds that inhabitants of the Prinkipo Islands, in the Sea of Marmora, near Constantinople, have been instructed to hold themselves in readiness to leave.

NORWAY MAY BECOME INDEPENDENT OF GASOLENE

CHRISTIANA, February 27.—Seeking independent from the United States in the matter of gasolene supply, Norwegian chemists are trying to produce a cheap alcohol for motor fuel.

Already a method has been discovered by a young chemist for utilizing the sulphite lye in the waste from wood pulp and cellulose, which heretofore has run off in sewers, polluting the rivers and poisoning fish. This waste lye, it is found, can be made to produce alcohol at a cost of 25 cents a gallon, as against the price of 35 cents for gasolene. It is said if this process were fully developed Norway could produce 5,000,000 or 6,000,000 gallons of motor alcohol a vear, and thus become practically independ-
